

IOWA COUNTY
ANNUAL DUST CONTROL PERMIT
2010

FEE - \$10.00
Paid _____

This permit is issued to allow application of temporary dust control on the county rock road system described below, and is subject to the conditions set forth as follows:

All dust control permits must be returned each year to the County Engineer's office with \$10 permit fee. This year's deadline is Friday, **April 30, 2010**. Office hours are 7:00 a.m. to 3:30 p.m.

The County Engineer's office must be notified and the application of dust control coordinated with the County prior to the application in order to prepare the road surface at no cost to the permit holder. After notification, dust control contractors shall apply dust control within 48 hours, weather permitting. The County shall not be held responsible in the event contractors apply dust control products prior to preparation of the road surface. Early application of dust control or applying dust control without coordinating application with the County could result in the blading of that section of road if the County deems necessary.

Obtaining a dust control contractor and paying same shall be the permit holder's responsibility.

Permit holders who use oil shall be responsible for maintenance of their own dust control sections, and if they do not attend to pot holes, the County Engineer shall order the sections scarified or bladed after which said section will revert to a granular surface.

Permit holders who use oil can obtain patching material at the Marengo and Millersburg Shops at no cost.

Maintenance of dust control sections applied with lignin sulfonate or calcium chloride shall on **October 1st** of each year **revert back to Iowa County** to be maintained as the County Engineer deems necessary.
